

HOW DO WE CARE FOR OUR COMMON GROUND?

Remember, only
rain down the drain!

Watersheds are interconnected with oceans. Actions taken at the neighborhood level have an impact on streams, rivers and ultimately, the Pacific Ocean.

Some steps you can take to care for your local watershed:

- Pick up pet waste
- Practice responsible car washing
- Manage water at home with rain gardens
- Reduce pesticide use inside and outside your home

The images and words used in the creation of this educational poster were contributed by the 5th Grade class of Boeckman Creek Primary School in 2022. In collaboration with CREST, students created informational artwork which helped inform and shape the Our Common Ground poster series.

Poster design and layout by Samara Group, LLC.
