

WHAT LIVES IN A WATERSHED?

OUR COMMON GROUND

Watersheds contain a variety of habitat types that support species diversity and abundance.

Watersheds contain many living things, including sensitive or endangered species like salmonids, amphibians, and migratory bird species.

"WE ALL LIVE IN WATERSHEDS"

"FISH, TURTLE, FROGS"

"FROGS AND TOADS LIVE IN THE WATERSHED"

"NEWTS"

"WATERSHEDS ARE IMPORTANT BECAUSE EVERY PLANT OR LIVING THING NEEDS WATER"

The images and words used in the creation of this educational poster were contributed by the 5th Grade class of Boeckman Creek Primary School in 2022. In collaboration with CREST, students created informational artwork which helped inform and shape the Our Common Ground poster series.

Poster design and layout by Samara Group, LLC.
